M. Usman Zahid

Jhelum Pakistan | +92 347 5199375 | usmanzahidx03@gmail.com | linkedin.com/in/usmanzahidx03

Associate Backend Engineer with over 1.5 years of experience building scalable web applications. Skilled in PHP (Laravel), SQL databases, Git, and RESTful APIs. Experienced in integrating third-party services and managing CI/CD pipelines for staging and production environments. Proven ability to contribute across development and DevOps workflows.

Experience

ASSOCIATE BACKEND ENGINEER | JULY 24 – PRESENT
Rev9 Solutions – Jhelum, Pakistan

· Designed and developed a scalable and fault-tolerant payment system, ensuring accurate financial calculations by implementing industry-standards to prevent errors.
· Architected a clean, modular codebase with core business logic separated from multiple access layers and delivery mechanisms.
· Led integration of third-party payment gateways and services, optimizing for reliability and maintainability.
· Contributed to DevOps workflows, including CI/CD pipelines and managing staging and production environments.
· Collaborated on a clinic management system, focusing on patient data accessibility and availability.
· Developed backend integration for an AI-driven file processing system, handling large file operations and AI data exchange.

BACKEND INTERN | MARCH 24 – JULY 24
Rev9 Solutions – Jhelum, Pakistan

· Assisted in backend API development using Laravel.
· Contributed to production features under mentorship and gradually took ownership of core modules.
· Participated in setting up basic DevOps tools and deployment pipelines.

Education

BS COMPUTER SCIENCE | JULY 24 | UNIVERSITY OF PUNJAB
CGPA: 3.53 / 4.00

· Final Year Project: Built a full-stack Student Collaboration Platform to promote practical, project-based learning in academic environments.
· Designed a scalable system with modern web technologies, enabling team formation, idea sharing, and real-time project tracking.

Skills

· PHP (Laravel Framework)
· RESTful API Development & Integration
· SQL Database Design & Optimization
· DevOps - CI/CD Pipeline Setup & Management
· Git & Version Control
· Scalable & Clean Software Architecture
